PROFESSIONAL SUMMARY

Impactful front-end developer experienced in building interactive, modern, and dynamic websites. I have gained strong experience during my internship at Addis Software, where I worked on the front-end development of an ERP system. Additionally, I have been developing local freelance websites, ranging from landing pages and multi-page sites to e-commerce web apps, for prominent companies like the Ethiopian Medical Student Association (EMSA) and American Prime, a wholesale company.

SKILLS

EDUCATION

Udemy: The Complete 2024 Web Development Bootcamp

- Full stack Web Development

PROFESSIONAL EXPERIENCE

Front-end Developer Intern | (June 17, 2024 - Present)

- Translated design prototypes into user-friendly interfaces for various modules of an ERP system, such as employee, payroll, attendance, reports, and payslip.
- Collaborated with back-end developers and existing ERP & HR teams to discuss and make decisions on how different interfaces and user interactions should be implemented to meet the desired goals (e.g, employee and admin roles and authentication workflows, data filtering, employee listing interfaces).
- Participated in meetings and discussions with the ERP and HR teams to understand their job requirements, workflows, and challenges.
- Worked closely with the design team for a consistent UI & UX.
- Maintained code quality by following best practices specific to the company and by conducting regular code review meetings.

TypeScript React.js Redux Redux-Toolkit Redux-Saga MUI

Freelancing (2022 - Present)

- I have developed a multi page website for for a company called Ethiopian Medical Student Association (EMSA)
- I am currently developing an e-commerce platform where users navigate, explore, search and filter various categories of shoes for a wholesale company called American Prime.

React.js Node.js MongoDB Passport.js Express.js Bootstrap
